

ADAMS COUNTY NURSERY, INC.

A large, close-up photograph of a pile of ripe apples, likely Honeycrisp or a similar variety, showing a mix of red and yellow skin. The apples are piled together, filling the lower two-thirds of the frame. The entire image is set within a decorative gold-colored border that has a semi-circular top and a rectangular bottom.

# Conservation Orders

# Best TIME TO ORDER

- Sooner the better
- June thru October
- Districts estimate anticipated sales putting a tentative hold on product based on past history.
- As sales season progresses numbers are scaled back or moved up depending on County sale activity.

ADAMS COUNTY NURSERY, INC.

# Suggested Varieties for Your Region

# Sales info

- Variety mix

- Depends on the County location.
- Some counties will order just apple.
- Others will order a mix of apple, peach, plum, pear and cherry
- All request semi dwarf freestanding tree on apple.

# Cut off time for sales

- March 1st is preferred date
- Gives us adequate time to set the order back
- Also allow us to time to sell any excesses.

# Advanced deposits

- Typically ask for a 25% deposit
- Conservation Districts deposits will be waived. Nice if the order has a PO #.
- Date of tree sale
- For Motor Freight shipping: generally like to ship by 1st three days of the week.

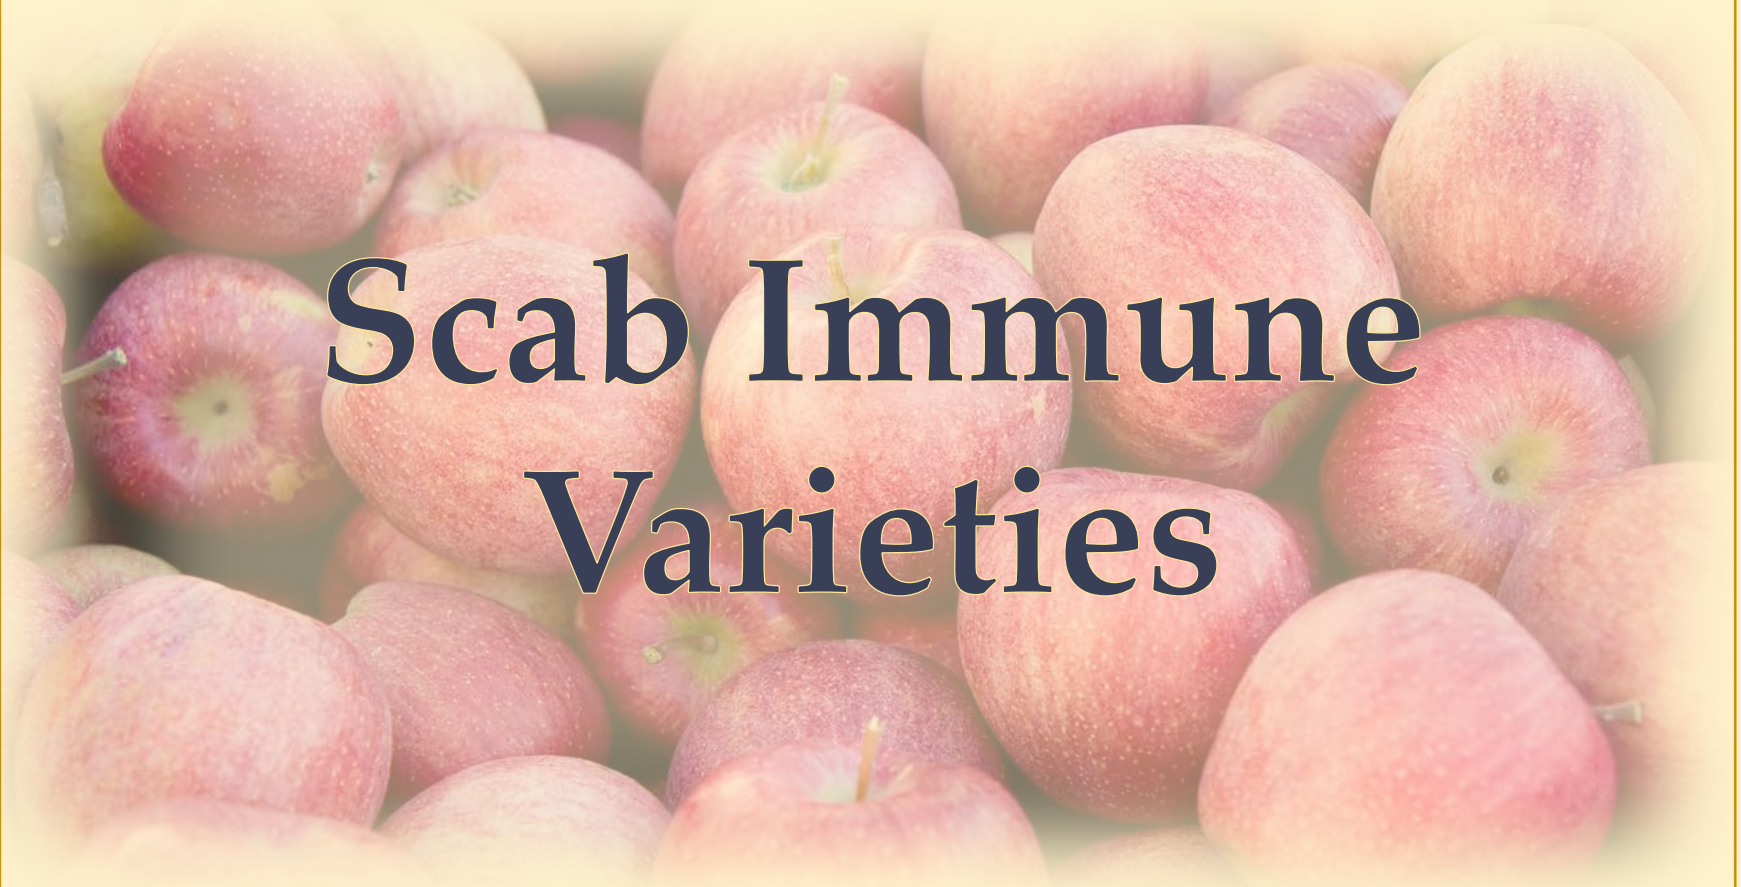

# Pre tagging and Bundling of orders

- Every District somewhat different
- Can print extra tags
- ACN can tag every tree
- Some request bagging and tagging
- Special packaging- two or three apple varieties per bag, one peach per bag, two different plums per bag or two different pears per bag

ADAMS COUNTY NURSERY, INC.

# Scab Immune Varieties

# APRILE INITIAL™

- (X-6163 Cltv.)
- Scab-resistant
- Picks one week before Gala
- Prone to fruit drop
- Fruit has good size with a crisp, mild acidic flavor
- Pollen sterile

# CRIMSONCRISP®

- PP#16,622 (CO-OP 39)
- Origin: Purdue-Rutgers Coop
- Tart, sweet flavor
- Flexible harvest date
- Tolerates heat; no sunburn observed to date
- Scab-resistant
- Late blooming
- Fire blight susceptible
- Huge potential for U-Pick, packer potential if enough volume planted.

# LIBERTY

- Resistant to apple scab, cedar apple rust, fire blight and mildew
- Yellow fleshed desert apple
- Vigorous and an annual bearer
- Picks before Golden Delicious

# ENTERPRISE™

- (Co-op 30)
- Deep red apple with medium to large size
- Highly resistant to fire blight and cedar apple rust
- Becoming an important processing variety

# GOLDRUSH

- (CO-OP 38)
- One of my late season favorites
- A Jekyll and Hyde apple
- Tart off the tree, sweet as sugar when stored
- Renewed interest as a main player for hard cider
- Tree habit very friendly, precocious even on big roots
- Apple is susceptible to cracking
